

Yeah, it's an HSI, like Einstein was a math teacher.

Introducing the new 360° Sandel SN3500 EHSI.

With patented light-bending technology and a 360° viewing angle (180° left/right and 180° up/down), the revolutionary SN3500 EHSI sets a new standard for compact HSIs.

Using the advanced display technology developed for the newest generation of aircraft, the SN3500's bright, high-contrast screen gives you incredible readability in any lighting. Its powerful, easy-to-use HSI

functions are unmatched among 3-ATI units, and its multiple navigation modes and Stormscope®, TAWS and TCAS I/Mode 'S' traffic interfaces keep you current with dynamic flight environments.

Add expandable I/O for datalink weather and MIL-SPEC vibration resistance, and the SN3500 is, quite simply, a work of genius.
